

Re: **Medium Fir Bark**

To whom it may concern:

Medium Fir Bark is ground and screened to a 1" to 2" inch size. This premium product has a high concentration of fines to block weeds, yet leaves a layer of nuggets on the surface when you rake it out. Medium Fir bark is an excellent ground cover not only for its tailored appearance, but as the bark decomposes, it naturally amends the soil. Medium Fir Bark meets the CalTrans requirements for Tree Bark Mulch 20-5.04B(2).

- **Medium Fir Bark is reddish brown in color**
- **The particle sizes range from 1 " - 2 "**
- **The average full load size is 100 cy**

Sincerely,

David Ray
