Re: Screened Almond Mulch

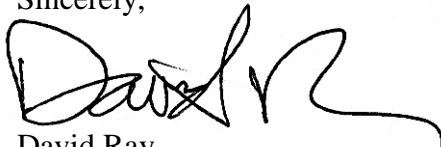

To whom it may concern:

Screened Almond Mulch is a low-cost ground cover sourced from the screening of ground Almond orchards. This non-dyed material comes from our Vernalis facility and is screened for a size range from 1/2" - 3". This mulch meets the Caltrans spec 20-5.04b (5) for Tree Trimming Mulch. It contains at least 95% by volume of material less than 3" long from any dimensions and not more than 30% by volume of material less than 1" long for any dimension. It helps the soil retain moisture and acts as a weed barrier. Can be used in drainage areas as a float resistant mulch.

- **Screened Almond Mulch is tan in color**
- **The sizes range from 1/2" - 3"**
- **The average full load size is 100 cy**

Sincerely,
