

Re: West Valley Mulch

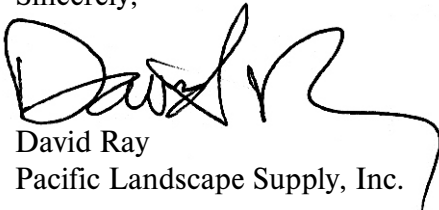

To whom it may concern:

West Valley Mulch is a low-cost ground cover sourced from the screening of our CDFA certified compost. This non-dyed material comes from our Vernalis facility and is screened for a size range from 1"-3". This mulch meets the Caltrans spec 20-5.04b (5) for Tree Trimming Mulch. It contains at least 95% by volume of material less than 3" long from any dimensions and not more than 30% by volume of material less than 1" long for any dimension. It helps the soil retain moisture and acts as a weed barrier. Can be used in drainage areas as a float resistant mulch. May contain pieces of debris. This material is SB 1383 compliant. It has a rough weight of 460 pounds per cubic yard.

- **West Valley Mulch is brown in color**
- **The sizes range from 1 "- 3"**
- **The average full load size is 100 cy**

Sincerely,
