LIGHTER/EASIER TO WORK WITH	✓	-
SAVES TIME	✓	-
SAVE UP TO \$5 PER CUBIC YARD DELIVERED	✓	-

At Pacific Landscape Supply we always have our ear to the ground listening to the needs of the landscaping industry. We know that compost is an integral ingredient to planting as an amendment to transfer nutrients and help plants grow. The problem with compost to landscaping companies is that it is a very heavy product and a max of 45cy can be delivered per truck. We fortify our Nitrified Sawdust with both iron and nitrogen to provide the same benefits to plants as compost but the advantage is it's a much lighter material. This makes it easier to handle and spread than compost and because we can fit twice as much per truck, it costs half the freight cost per yard to deliver! Did we mention it's weed seed free?
